Spring 2016 Newsletter

Schedule Your A/C Tune Up Today!

Warmer weather is finally here and it is time to schedule your air conditioning service. It is a multi point cleaning, safety inspection and performance check. Doing so preserves your system warranty, reduces energy usage and makes your home more comfortable. **Call us** at (336) 298-7598 or **request online here**.

R22 Phase Out Affects Majority of Homeowners

The EPA has cut production of R22 refrigerant, which is found in the majority of HVAC systems installed prior to 2012. R22 will eventually be phased out and no longer available by 2020. This should greatly affect the decision making process and planning for anyone who owns HVAC equipment with R22. If your HVAC system was installed before 2012, this most likely affects you. **Click here to learn more.**

Meet the Third Generation Nest Thermostat!

The third generation Nest thermostat has a larger display and enhanced features to save energy and provide better comfort. Control your HVAC system online from your mobile device or computer. It learns your schedule, knows when you're not home so it can save energy. It can provide energy usage reports and even tell you when your system is not operating correctly. **Click here to learn more.**

Leave a Review!

Our business counts on reviews from our customers. It gives us valuable feedback on our level of service, helps others learn about us, and helps us rank higher on internet searches. **Click here** or use the QR code to leave a review!
